Summary

This is a simple todo list that allows users to add a task to a list with a picture, then remove or mark the task as completed.

Audience

This app is for people who want to remember what to get when they go shopping, or someone who wants to easily keep track of things they need to do or things they have already done.

How The App Will Be Used

Example 1

User adds a task that needs to be complete, marks it as complete, then deletes it.

Example 2

User creates a new task, takes a picture for the task, then marks it as complete

Example 3

User creates a new task, then deletes it.

Main Features

- Tasks will stay even if a user quits and goes back to the app
- Users can add and remove tasks
- Users can mark tasks as complete
- Users can take pictures to add to a task
- When user unpauses the app, a message that says "welcome back" pops up
